- Commit to the achievement of TOEFL with a score of 79-80 within the first year of attendance and in any case before the period of frequency abroad.

## 10 – Doctorate Degree - Qualification

- 1 . The title of Doctor of Philosophy , abbreviated with the words: " Dott.Ric . " Or " Ph.D." , is released as a result of the positive evaluation of a research thesis that contributes to the advancement of knowledge or methodologies in the field investigation of choice.
- 2 . The PhD student to be admitted to the final examination for the award of degree of Doctor of Philosophy, must have earned the credits provided by the *training plan* prepared by the Academic Board of the PhD .
- 3 . To participate in the final exam , students must submit to the Rector by 30 November of the third year a special instance and by January 31 for a paper copy of computer support three of the final thesis in .Pdf format .
- 4 . The PhD thesis , accompanied by a summary in Italian and English, is written in Italian or English or in another language prior approval of the Academic Board . The thesis , to which is attached a report on the activities of the student in the course of the PhD and publications, if any , shall be assessed by at least two highly qualified teachers , including those belonging to foreign institutions in the cases under art. 15 of the Rules of University's doctoral research , external to the parties that contributed to the release of the title of PhD , hereinafter referred to as evaluators .
- 5 . Evaluators make a judgment on the analytical writing thesis and propose the admission to public discussion or referral for a period not exceeding six months if deemed necessary significant additions or corrections. After this period , the argument is in any case admitted to public discussion , accompanied by a written opinion of such new evaluators , made in the light of the corrections or additions may be made.
- 6 . The public discussion takes place before a Commission whose composition is defined by art. 22 of the Regulations, within the six months immediately following the expiry date of the PhD course . At the end of the discussion , the thesis , with reasoned written judgment collegial , it is

<p><b>Expected career and professional opportunities</b></p>	<p>The objective of the Ph.D. is to provide competencies for a successful employment in the job or research market by contributing to the competitiveness increase of the area pertaining to the program.</p> <p>The training course "Civil Engineering" provides employment opportunities in the field of geotechnical, hydraulic and structural engineering and of civil infrastructure through training specialists in design, planning, management, control and monitoring. The reference areas of employment are public authorities and the world of engineering technicians.</p> <p>The training course "Environmental Engineering" provides employment opportunities in the field of environmental engineering and contributes to the training of experts in the design, management and control of works and sustainable infrastructure systems and of materials with low environmental impact, systems for the control, protection and management of the land to monitor and mitigate risks.</p> <p>The training course "Safety Engineering" provides employment opportunities in the field of materials, energy, monitoring and control through training specialists in the study of innovative materials, production of energy from renewable sources and with a low-impact, planning and management of complex systems and networks and design and management of networks for environmental monitoring.</p>

<b>Training aims</b>	<p>The doctoral program is interdisciplinary and is intended to allow discussion in the basic scientific areas. The research topics are aimed at deepening economic and legal knowledge, even using the method comparative studies and in view of European harmonization, with reference to legal systems, the theory and practice of the legal regulation of business and work. The dual approach of the analysis - juridical and economic - allows to create an effective interdisciplinary in teaching and research. In this regard, there is a tradition at the international level, especially in common law countries, in the economic analysis of law (Economic Analysis of Law), which constitutes one of the bases of the training course for the acquisition of technical and scientific skills, in order to ensure a vision of the economic phenomenon in its entirety with reference to the same rules that govern the production of "the market" and not as a pure mechanism.</p>
<b>Employment and professional outlets</b>	<p>The PhD intends to launch graduates in scientific research, as a fundamental moment for the subsequent teaching and research activities, to form managers in the public sector or in private enterprise. It integrates with the master for public administrations organized by the Department.</p>
