REGGIO CALABRIA

New Metropolitan Perspectives

CLUDs PROJECT

The integrated approach of Urban Sustainable Development
through the implementation of Horizon/Europe2020

WWW.ISTH2020.ORG

**Welcome to ISTH2020,
NEW METROPOLITAN PERSPECTIVES.**

The integrated approach of Urban Sustainable Development through the implementation of Horizon/Europe2020

ISTH2020 is promoted by the LaborEst (*Evaluation and Economic Appraisal Lab*) and CLUDs (*Commercial Local Urban Districts*) Research Lab, PAU Dept. Mediterranea University of Reggio Calabria (Italy), it is part of The CLUDs project-funded by the Seventh Framework Programme, IRSES, MarieCurie action. Its main aim is to receive contributions from national and international scientific community on integrated development strategies and research in metropolitan contexts according to the directions of Europe 2020 and Horizon 2020.

The aims of the Symposium are:

1. Strengthening the international exchange in order to promote joint research activities according to the objectives of the 2014–2020 programming period.
2. Stimulating the debate on community engagement and new forms of public-private partnership within urban-rural networks and metropolitan areas.
3. Promoting an integrated approach through specialized inputs merging on the creation of strongly localized - and not generalized - interventions and actions, fostering a the bottom-up, rather than the “top-down” approach.

The International Symposium is focused on the comprehension of metropolitan dynamics in order to promote local economic development, especially in urban and rural contexts. Furthermore, consideration is given to the opportunity to promote new metropolitan models; in other words, it is needed a reflection on cities’ ability to implement metropolitan dynamics and to improve their competitiveness while exploiting the virtuous and synergic linkage between urban and rural areas.
